

**RADIATOR IRAN**

## INTRODUCTION TO Radiator Iran

Radiator Iran manufacturing Co. has been established at 1962 as a first radiator manufacturing corporation in the country with 15 to 30 thousand part capacity and presently is one of the leading manufacturer of auto complete radiators & heat exchangers in the Middle East through developed facility and experienced experts.

At present time, Radiator Iran Co. with more than 5 decades experience with 140b Rial investment and production lines with 15000sq.m and other Dept. like: laboratories, warehouses, research, business administration, with an area exceeding 31000sq.m. with design and technical knowledge, design and manufacture of advanced equipment and experienced specialists in the field, a manufacturer of automotive radiators and heavy (aluminum, copper-brass) and the cooling system of the car heater thermal mass to exchangers for various industries, oil coolers, heat exchangers, aluminum high pressure, expand ,replacement cores, radiator parts are for companies and aftermarket .

Now, the company with annual production capacity of 2 million pieces of radiator is one of the largest suppliers.

## Production

In order to meet internal and external market demand, Radiator Iran Co. has developed its products range by the help of experienced engineers and the most up to date technology.

The complete basket of products has been manufactured through the establishment of related companies and equipped production lines. It has a great market share of heat exchangers and coolers systems in different industries. The products are:

- Aluminum complete auto radiators – intercoolers – evaporators and condensers – heaters and coolers (A.C.)
- Brass and Copper auto complete radiators – Replacement cores for light and heavy trucks.
- Heat exchangers and coolers for water – oil - ... for the usage in: power stations, cement, gas, petrochemical and other heavy and basic industries.

AUTOMOTIVE  
GROUP

**Radiator Iran** Co. in the design and manufacture of Industrial and heat exchangers as part of a variety of types of cooling systems for high pressure water and steam turbine power plant needed international projects such as the Karkheh, Dez, Karun 3, Masjed Solayman and Scroll all stages of design, construction and installation by international companies such as Siemens and

has been approved. Also active in, in the context of designing and manufacturing water radiators, air and oil generators Du-vets, I've Hitachi and steel radiators of air-to- air, oil and water for high voltage compressors, various unit standards required for induction furnaces, electric Qvs and heat exchangers are required to work in the oil industry.

## Quality Assurance

Radiator Iran Co. had had the most success to get highest quality and customer satisfaction by improving and efficient methods of collaborative management system.

## Sales

Radiator Iran Co. has more than 60% of internal market share as the biggest manufacturer of auto radiator and moreover, 15% of the products are being exported to 25 countries in the world like: Germany, France, Spain, Italy, Greece, Holland, Russia, Belgium, Slovakia, Ukraine, CIS and the Persian Gulf and African countries. To supply products with distinct quality and extraordinary services to customers is the main policy of the company.

## Certificates of Quality Assurance

As the first in Iran, in 1995 Radiator Iran Co. has been found to conform to the quality assurance standards and has been granted the certificate ISO9002. After great results in designing different products, in 1998 got ISO 9001.

In 2002, in accordance with company quality goals, by employing veteran consultants, educated staff and progressive internal audits, got quality certificate of QS 9000.

In 2004, got ISO/TS 16949:2009 for design and production of auto radiator from MIC, Britain and OHSAS 18001 from DNV, Netherlands.

In 2011, got the Collaborative management system certificate IMS (OHSAS 18001:2007, ISO 14001:2004, ISO 9001:2008) from MIC for progressive execution of respective standards.

In 2011, got ISO 50001:2011 from TÜV NORD, Germany for successful energy management system implementation and got ISO 10004:2010 certificate for monitoring customers Satisfaction Survey from ACS, Britain.
